Student Researcher | Urban GNSS | Navigation | Intelligent Transport

PROFILE

High-school student researcher interested in urban GNSS, resilient navigation, robotics, and transport engineering. Focused on positioning challenges in dense cities and on translating technical research into practical systems.

EXPERIENCE

APR-AUG 2026

Independent Researcher - IPN Lab

Research activity centred on GNSS and urban navigation.

2026

Stairio Project

Hardware and mechanical component development for an autonomous staircase inspection robot.

ONGOING

Independent Technical Study

GNSS datasets, receiver outputs, urban navigation, robotics, and engineering communication.

EDUCATION

IB Diploma Programme - HL Mathematics AA, Physics, Economics; SL Chemistry, Chinese B, English Language and Literature.

RESEARCH INTERESTS

Urban GNSS; resilient navigation; intelligent transport; robotics; multi-sensor positioning; transport engineering.
